

**Overview of September 2011 Activities**  
**October 12, 2011**

The Los Angeles Police Department Sexual Assault Evidence Kits (SAEK) Progress Report provides significant information about the status of the SAEK backlog elimination project. The Serology/DNA unit is also responsible for processing and conducting analysis for biological evidence unrelated to sexual assaults, as well as additional evidence related to sexual assaults. This report is a reflection of the productivity associated with the SAEKs.

The September Progress Report shows a total of 405 Remaining Untested Kits. Of the 405 Remaining Untested Kits, 136 are currently in progress at a contract laboratory. The number of kits where testing has not yet been completed in-house is 269 (41 have not yet been requested or assigned; the remainder are in progress). None of the remaining untested kits are from the Historical Backlog, which is now zero. There were an additional 110 new SAEK's collected in September.

**Any new request for analysis of a sexual assault evidence kit is immediately put into the process of assignment to an SID criminalist for analysis (in-house or outsourced). There is no backlog of unassigned requests for analysis of SAEKs at SID.**

The Report shows a total of 168 Pending Technical Reviews. All data from the analysis of SAEK's by contract labs is put into the technical review process immediately upon return of the data.
